Doctor Simon Ourian

Epione of Beverly Hills

When I went to visit Dr Simon Ourian, I have already seen his work on several people and I was truly impressed, not only was the work so natural and well done it read integrity right away, the people were happy and most of all felt that they were treated with respect affection and true understanding of

their personality and day to day needs.

WOW!! what a concept in the plastic and esthetic industry ,somebody that cares about your feelings and the way your parents and nature created you, not what he thought you should look like which is what happens so often. You can tell who has done the work, all the patients look similar with a signature that is not individual and it doesn't look like you any more, to say the least, many people looks deformed. No cutting, no dangerous Anesthesia and long term side effects!!!!

I went in his clinic and as soon as I entered it was an atmosphere of peace and beauty. The staff immediately assisted me, offered me tea and asked me if I wanted anything else when I waited. After a few minutes they took me back to a very comfortable room and when Dr Simon came in I instantly knew why people that I have talked to felt such affection for him, not only a very graceful handsome man with a lovely smile, what really touched me was his honest eyes and the humbleness with which he treated me. He listened to me, we talked first about the Authority Blog I created and he still listened without any interruption, he was very supportive and we talked about what he would do for me if I decided to do some work for the reasons I previously gave. I was always apprehensive to chase the Holy Grail especially going under anesthesia and so many other risks, well all of those fears disappeared once I met Dr Simon Ourian.

I definitely will have my friends and family try his work, as well as myself, and I wish for you to give Dr Simon Ourian a try .

When I research the name Epione I found that it came from Greek Mythology and it meant The Goddess of the soothing of pain. In fact her name actually means soothing, and that I personally guarantee you is how Dr Simon Ourian is.

**Education:** Dr. Simon Ourian obtained his undergraduate degree in Molecular Biology from CSU Northridge with high honors. He was then awarded his medical degree in 1994 from Wayne State University in Michigan. In late 1994, he started his residency training at UCLA, where he developed an interest in the field of laser and aesthetic surgery. He continued his post-graduate studies in a continuing medical education course given in August of 1997 and, again in August of 1998.

**Company:** In 1998, he and his brother, Dr. Bob Ourian, co-founded the Epione Laser Institute. Today, Epione, located in the heart of Beverly Hills, is one of the most comprehensive, state-of-the-art laser and aesthetic surgery centers in the world.

Dr. Simon Ourian has been instrumental in the development of several laser systems that are now utilized here in the Center and in leading medical facilities around the world. He has been featured many times in numerous national and international media. Dr. Simon Ourian holds memberships in the American Society for Laser Surgery & Medicine.

Doctor Simon Ourian's Epione is one of top Los Angeles cosmetic plastic surgery practices in the industry. Not only do they carry out and specialize in a lot of differentiating procedures, but they stay up to date with the newest technology and have even introduced several great techniques on the market that are absolutely safe and have already helped hundreds of patients.

People travel from far and wide to the famous Los Angeles cosmetic plastic surgery center for different reasons. Some people want to see a specific changes in their appearance while others want to look younger. Some people have had an accident in their life or were born with a physical flaw and develop a certain feeling which doesn't make them proud of

their body.

## Look At These Uplifting Before And After [Facelift](#) Surgery Pictures

You look tired. Have these words become the bane of your life? Does your spouse say this to you? Do your friends? Or your children? Are you getting tired of being told that you “look tired”? Well you do not have to put up with it. Look at the **before and after pictures of [facelift](#) surgeries** above and find out what millions of women like yourself have discovered for themselves. There is a solution. You do not have to surrender to premature aging, you can take the fate of your physical appearance in your own hands just as the women in the before and after **facelift surgery** pictures above did.

Epione of Beverly Hills (Los Angeles) offers several unique laser skin treatment options to help [remove stretch marks](#) and get rid of an unwanted hair or a [tattoo – removal](#) treatment options include [Coolaser™ technique](#) and [Blue Light Therapy](#) sessions. We also help combat aging with an [eye lid surgery](#) to reduce bags and wrinkles, and our [mini face lift](#) is a popular choice to regain a youthful look. Read our articles for [More Information](#) or read our [cosmetic surgery testimonials](#).

[Epione Skin Care Products](#): Epione developed and offers an [Eye Creme](#), [Hydration Moisturizing Creme](#), [Signature Series Restoration Firm & Lift Creme](#), [Sunblock Creme](#), and carries [Allergan's LATISSE](#).

## Epione Skin Care

In addition to offering the latest in aesthetic medicine and treatments, Dr. Ourian has created a Signature Series line of [skin care products](#). The genesis of the skin care line was Dr. Ourian's frustration, early on in his practice, with the availability of pharmaceutical grade products that he could recommend to his patients. Over the years, working together with several Los Angeles based laboratories, Dr. Ourian tested and perfected a line of products that could be sold over the counter. These products incorporate state of the art science, technology and ingredients.

The primary objective of the entire skin care line is to address sun damage, the number one reason our patients come to see us. Sun damage destroys skin tone and collagen resulting in discoloration and wrinkles and generally making people appear older. From the [SPF40 Sun Block Protect & Correct](#) to the [Correction](#) and [Restoration Firm & Lift](#) creams, the Signature Series line of products is designed to help prevent the occurrence, and remedy the results, of sun damage.

Epione is an advanced cosmetic medical center located in Beverly Hills, California. Beverly Hills is a fashionable residential area for show business personalities. In a city where the way you present yourself and your looks are very important, Epione receives a lot of credit from clients and their client's loved ones. Technology has created amazing advances that were thought impossible just a decade ago. Our lifestyle changes, medical advances, and technological breakthroughs have enabled us to feel younger and more vital through middle age and beyond. Our appearance, however, frequently stifles our youthful spirit. This process of aging often begins in our thirties—well before the prime of our life!

In 1998 we envisioned a [cosmetic surgery center](#) where everyone could benefit from the most recent advances in aesthetic and

anti ageing medical technology. Epione was one of the first centers in California dedicated to the practice of aesthetic laser surgery. Through the years, this cosmetic surgery center has distinguished itself for excellence in clinical and technological advances pioneered by the doctors.

Today, Epione, located in the heart of Beverly Hills, is one of the most comprehensive, state of the art laser and aesthetic surgery centers of its kind in the world. Epione is designed to offer clients comfort, convenience and privacy. We have specialized in the most current technology available for [skin](#), [hair](#), and [body](#) contouring. Our staff is dedicated to providing our clients with the highest level of personal attention and care. We work as a team with you to restore or create the desired appearance.

Epione has been the site of exciting, innovative research projects designed to improve patient care and evaluate new technology. Physicians, surgeons, nurses and other health professionals strive to serve their patients with a combination of technical expertise and personal compassion. The physicians at the Center have been instrumental in development of several laser systems, which are now utilized here in the cosmetic surgery Center, and as well as leading medical facilities around the world.

Many people who come to Epione seek a specific change; others desire a more youthful appearance. Some are referred by physicians; many come to the Clinic on their own. All are

served by a dedicated staff of health care professionals. In fulfilling the mission of this organization, we strive to occupy a special and unique place in the hearts and minds of our patients.
