Folk medicine occasionally referred to as alternative or

traditional medicine, is a part of healing that has an extensively long history. Folk medicine originates back 5,000 years. The dispensation of history is divided in three eras, the classic historical era, the medieval era, and modern eras. I was raised with herbs and home remedies since a baby and where I grew up our Doctors practiced both for most part, so for me I always use what I feel at that moment, has its place. Two thirds of the world's population lives in countries that have inadequate resources to access of modern medicine so I found for that reason folk medicine is formally acknowledged in many countries .Today it is still extensively used due to their perceived effectiveness.

It is vital to be informed and careful about possible compound interactions before using any Folk formula. Like anything, nature has its own contradictions as well. Please use your discretion and do a small test when in doubt, always remember consult your health practitioner, have fun and enjoy.
