On week 348 we are sharing:

Folk medicine occasionally referred to as alternative or traditional medicine, is a part of healing that has an extensively long history. Folk medicine originates back 5,000 years. The dispensation of history is divided into three eras, the classic historical era, the medieval era, and modern eras. I was raised with herbs and home remedies since a baby and in Chile, Doctors practiced in a very different manner for the most part and by that, I mean western medicine combined with Homeopathy and herbology so for me, I always use what I felt at that moment had its place for whatever need. Two-thirds of the world's population live in countries that have inadequate resources to access modern medicine so I found that the reason folk medicine is formally acknowledged in many countries. Today it is still extensively used due to their perceived effectiveness.

It is vital to be informed and careful about possible compound interactions before using any Folk formula. Like anything, nature has its own contradictions as well. Please use your discretion and do a small test when in doubt, always remember to consult with your health practitioner, have fun and enjoy.
